29 July 1958

MEMORANDUM FOR : Special Assistant to the Director
for Planning and Development

THROUGH : Director of Administration, DPS/DCI

SUBJECT : [REDACTED]

1. I am forwarding this memorandum to note our incon-
clusive review of the [REDACTED]
during our West Coast trip and discussion on 14 July.

2. You will recall it was my impression, which I con-
veyed to [REDACTED] work currently being
done at Eastman-Kodak is to be transferred to the [REDACTED]
Company in Boston under a contract let by [REDACTED] Further, the
Air Force (ARDC) was going to enter into a normal contract
relationship with [REDACTED] covering this requirement. I understood
the EK assignment would encompass the work being accomplished
for IT&T. Assuming this to be the arrangement, I advised
Flender some weeks ago this situation was most beneficial from
a security point of view, i.e., it established a bonafide contract
between [REDACTED] and the Department of Defense. It would also remove
us from a minor area of industrial security responsibility over
[REDACTED]

3. During our 14 July conversation, it seemed the above
described relationship was not firm and in fact we might end
up carrying the [REDACTED] under one of
our Air Force [REDACTED] contracts administered by [REDACTED]
This latter situation changes the benefits outlined above and,
of course, complicates our security responsibility in this area.

4. Either relationship is workable, but to get necessary
arrangements in process, I am in need of specific guidance as to
your wishes in this matter.

5. In your consideration of this matter, you might wish to take into account my conversation with [redacted] on 22 July. He advised the facility clearance for [redacted] is moving along quite satisfactorily and the two offices of the Air Force concerned, OSI and Air Procurement District of Boston, have received clearance advise on SEI employees and conducted a premise inspection, each meeting their satisfaction. It appears we are now going through a paper processing time of one to two weeks for ratification purposes. In addition, there is a need for biographic data on the trustees of [redacted]. This data was obtained from our Security records and forwarded to [redacted]. We will keep you apprised of the developments in this facility clearance area.
